MySQLWork 1819 macbookpro 12u IPv4 0xb1651483b9cfcb56 0tB TCP localhost:49866->localhost:mysql (CLOSE WAIT)
MySQLWork 1819 macbookpro 13u IPv4 0xb1651483b9cfcb56 0tB TCP localhost:49866->localhost:mysql (CLOSE WAIT)
mysqld 778 macbookpro 21u IPv4 0xf686d79f6d8767c8 0tB TCP *mysql (LISTEN)
```

2. Buat user baru pada root dengan syntax

```
mysql> CREATE USER 'Harits'@'%' IDENTIFIED BY '12345';
Query OK, 0 rows affected (0.01 sec)
```

3. Berikan hak akses secara penuh pada user baru dengan syntax

```
[mysql> GRANT ALL PRIVILEGES ON *. *TO 'Harits'@'%' WITH GRANT OPTION;
Query OK, 0 rows affected (0.00 sec)
```

4. Lakukan reload pada server.

```
[mysql> FLUSH PRIVILEGES;
Query OK, 0 rows affected, 1 warning (0.01 sec)
```

5. Tampilkan table user yang baru saja dibuat

```
mysql> SELECT User, Host, Select_priv, Insert_priv, Update_priv, Delete_priv, Create_priv, Drop_priv, Grant_priv
-> FROM mysql.user
-> WHERE User = 'Harits';
+-----+-----+-----+-----+-----+-----+-----+-----+-----+
| User | Host | Select_priv | Insert_priv | Update_priv | Delete_priv | Create_priv | Drop_priv | Grant_priv |
+-----+-----+-----+-----+-----+-----+-----+-----+-----+
| Harits | % | Y | Y | Y | Y | Y | Y | Y |
+-----+-----+-----+-----+-----+-----+-----+-----+-----+
1 row in set (0.00 sec)
```

C. Langkah – Langkah Praktikum

1. masuk pada akun mysql yang sudah disediakan lab

```
(base) macbookpro@MacbookPros-MacBook-Pro ~ % mysql -u sbd -h 10.34.32.127 -p;
Enter password:
Welcome to the MySQL monitor. Commands end with ; or \g.
Your MySQL connection id is 121
Server version: 8.0.30 MySQL Community Server - GPL

Copyright (c) 2000, 2024, Oracle and/or its affiliates.

Oracle is a registered trademark of Oracle Corporation and/or its
affiliates. Other names may be trademarks of their respective
owners.

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
```

2. lihat apa saja privileges yang bisa anda lakukan dengan akun tersebut

```
[mysql> SELECT * FROM information_schema.schema_privileges;
+-----+-----+-----+-----+-----+
| GRANTEE | TABLE_CATALOG | TABLE_SCHEMA | PRIVILEGE_TYPE | IS_GRANTABLE |
+-----+-----+-----+-----+-----+
| 'mysql.sys'@'localhost' | def | sys | TRIGGER | NO |
| 'mysql.session'@'localhost' | def | performance_schema | SELECT | NO |
+-----+-----+-----+-----+-----+
2 rows in set (0.01 sec)
```

3. gunakan salah satu database yang sudah ditentukan pada saat praktikum

```
[mysql> use powerrangers;
Reading table information for completion of table and column names
You can turn off this feature to get a quicker startup with -A

Database changed
```

4. di dalam database yang disediakan di tabel yang juga sudah disediakan (tabel sbd) isikan data sesuai dengan struktur tabel dan data diri anda masing-masing

```
mysql> INSERT INTO mahasiswa (NIM, NAMA, PRODI) VALUES
[ -> ('2400016087', 'Muhammad Harits Arrozzaq', 'Sistem Informasi');
Query OK, 1 row affected (0.03 sec)
```

5. tampilkan bahwa data yang anda masukkan ke dalam tabel tersebut sudah masuk ke dalam tabelnya.

```
mysql> select * from mahasiswa;
```

NIM	NAMA	PRODI
16044	Bro Kangkung	Sistem Informasi
230001	Bahlil	Etanol

29 rows in set (0.02 sec)
```

D. Kesimpulan

Remote akses database memungkinkan pengguna untuk mengelola dan mengakses database MySQL yang berada di server lain melalui koneksi jaringan dengan menggunakan perintah tertentu. Untuk dapat melakukan akses tersebut, perlu dilakukan pengaturan firewall, pembuatan user baru, serta pemberian hak akses (privileges) yang sesuai agar koneksi dapat berjalan dengan aman dan lancar. Melalui percobaan ini, mahasiswa dapat memahami konsep dasar administrasi pengguna serta proses koneksi jarak jauh pada sistem basis data MySQL.
